

Workgroup CHRONOECOLOGY

Noiseless releasing of a trap

Features:

- highly climate resistant
- high reliability
- triggering time approximately 0.5 sec
- releasable weight approximately 50 kg
- useable for different types of traps
- releasable on long distances as well by wire as wireless
- releasing without any noise

The solution was successfully applied for traps with trap doors or swing-doors as well as releasing net traps.

box trap for red deer

net trap for roe deer
